

Grand Rapids FAAS Team presents:

## **Swift Unleaded Fuel Update**

Jon Ziulkowski and Brian Stirm of Swift Fuels will present an hour-long seminar outlining the coming transition to unleaded avgas for the General Aviation segment of piston aircraft. Swift is the industry leader in this FAA/EPA/industry sponsored effort. Details will be put forward on Swift's current marketing of UL94 unleaded avgas within the US such that the unleaded transition may begin now for over 65% of the current GA fleet. Additionally, Swift Fuels is one of two companies with high octane alternative fuels going forward into Phase Two of the FAA's Piston Aviation Fuels Initiative (PAFI) to replace (2018) the embattled 100LL avgas currently used by the US and worldwide fleet of GA piston aircraft. A question and answer session for pilots and maintenance personnel will follow the presentation.

**Directions:** Meeting will be held in the Airport Administration Building. Fly-in aircraft should park on the north side of the ramp, opposite the Administration Building.

#### **A message from the National FAASafety Team Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
